

Scientific Validation and Decision Support Analysis

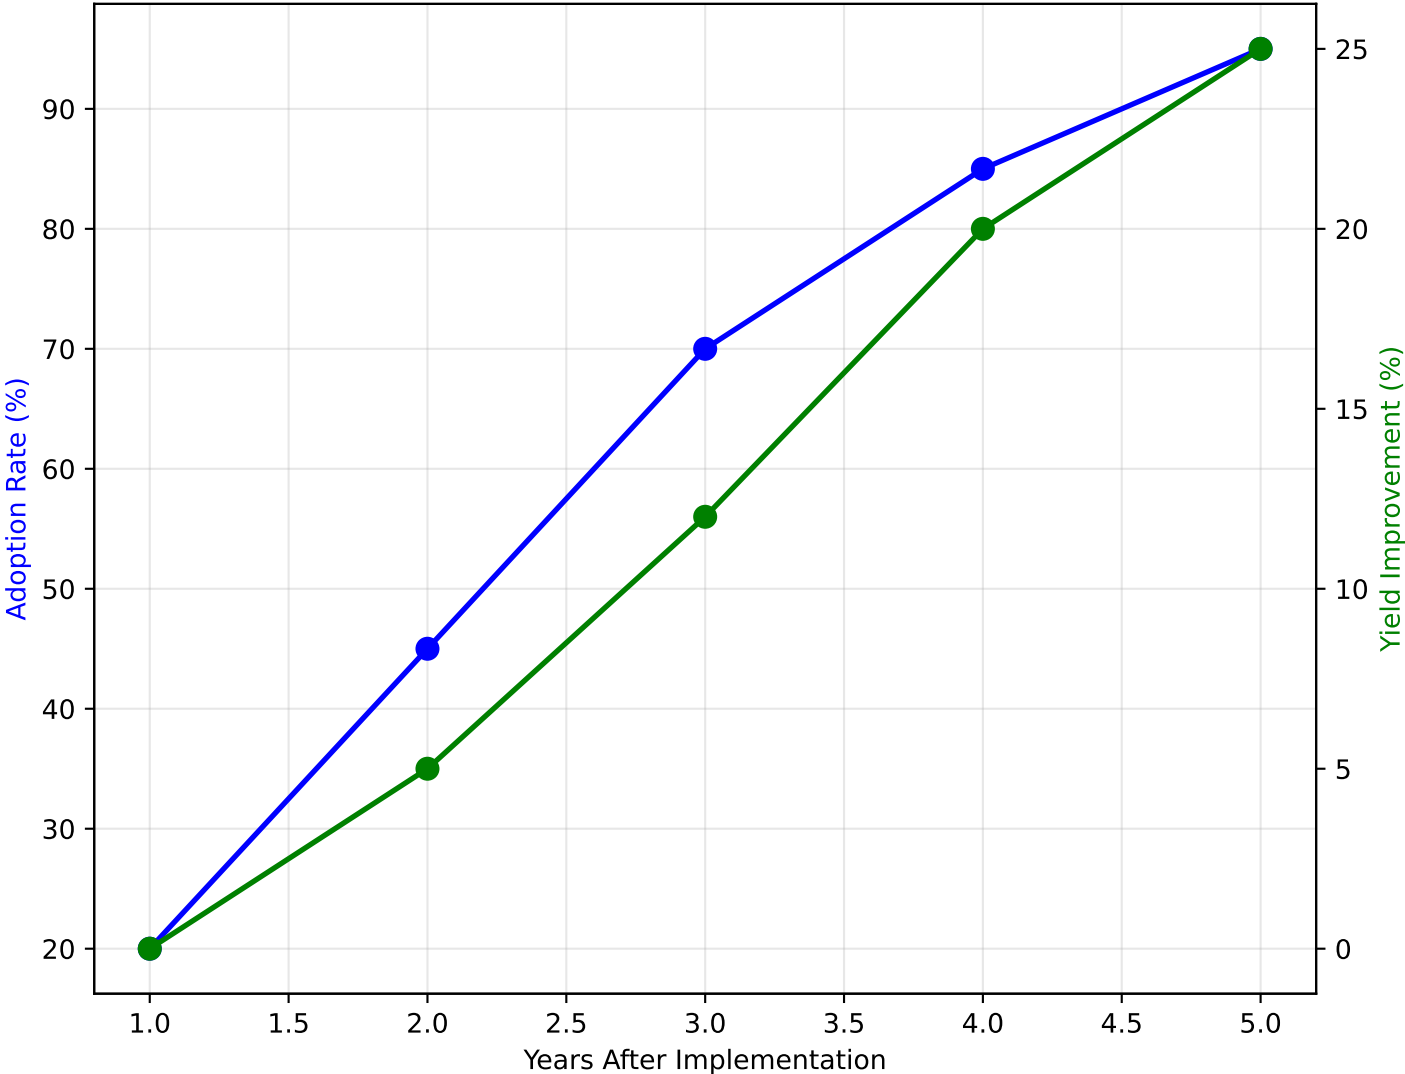

Implementation Guide and Performance Monitoring

Rice Management Calendar

Expected Technology Adoption Timeline

Field Monitoring Checklist

- ☐ Daily max temperature monitoring (first 40 days)
- ☐ Soil temperature tracking (planting decision)
- ☐ Radiation assessment (grain filling period)
- ☐ Soil organic matter testing (annual)
- ☐ Phosphorus availability check (pre-season)
- ☐ Water depth measurement (growth stage specific)
- ☐ Weather forecast integration (weekly)
- ☐ Yield mapping and analysis (post-harvest)

Key Performance Indicators

- Yield: Target >25% improvement **25%**
- Input Efficiency: Cost/benefit ratio >3:1 **85%**
- Risk Reduction: CV <15% year-to-year **78%**
- Sustainability: Soil OM maintenance **90%**
- Adaptation: Weather response capability **70%**
